

Why Verify Accredited Investors?

The legalization of General Solicitation of private investment through SEC's Regulation D, Rule 506(c) has created opportunities for investors and entrepreneurs to connect in a more open and transparent fashion than ever before. What has been historically prohibited, is now specifically enabled with the goal of increasing investment opportunities and access to capital. With that newly created venue comes new requirements for all issuers, investors, and facilitators of the private investment transactions.

Issuers of publicly marketed, private securities (generally, entrepreneurs) and ICO token sales must now take "reasonable steps" to verify that all investors in their company qualify as Accredited. Self-certification of being an Accredited Investor is not sufficient when investing in Generally Solicited private securities. But now through EarlyIQ, Regulation D, 506(c) investors can verify as Accredited with our simple online solution.

EarlyIQ helps investors, companies, angel groups, hedge funds and online platforms comply with the heightened accredited investor verification burden. Our solution is:

- Simple. Investors are verified in 3 Simple Steps ([our process](#)) in a super easy, 100% online process that takes about 10 minutes.
- Safe. EarlyIQ goes beyond "reasonable steps" with the only Accredited Investor Verification service offering Positive Identity Authentication to reduce fraud. Plus, Investor's personal data remains private and is never shared with the issuer.
- Secure. With 256 bit encryption and Extended Validation, EarlyIQ offers the latest and most comprehensive security in the industry. [More](#)
- Easy. Our platform features an Accredited Investor Dashboard where issuers can view all of their investors' accreditation status at a glance.
- Flexible. Issuers can invite Investors via a simple email, a fully integrated private label solution or just about anything in between. [Contact us](#) for details
- Cost Effective. Because EarlyIQ is automated and efficient, we can offer Accredited Investor Verifications at the lowest cost in the industry.
- Private. Get verified while maintaining control of your personal information. Personal data is never shared with the issuer.
